Discussion Board Rubric

- Please begin your postings early in the module so that the instructor/TA and the other students have time to respond to your posts. This will also aid you in the understanding of the material.
- You may either start a new thread or participate in an existing thread. Since this is a "discussion", you are encouraged to interact with other students.
- Your posts should not be a repeat of what other students have already posted. If there is a thread on a question or problem, please join in the existing discussion. You can post different insights or perspectives on the same question.
- Your posts should contain details which indicate that you have been studying (or working through the material).
- Each Module carries **3-points** for participation. The closing dates are posted.

Task	Levels of Achievement		
Criteria	No Credit	Partial Credit	Full Credit
Participation in Discussion Board - Start a new thread or respond to an existing thread	**0%** No posts or no substantive posts, such as "Good Job" and "I agree".	**60%** Posts are cursory or show no thought, such as "How do I do problem 7 in Assignment 1, with conditional probability?".	**100%** 2 well thought-out high-quality posts, such as "In assignment 2, Problem 6, I believe that the probability is calculated with geometric random variable. You can find this in the lecture on Discrete Random Variables, Slide 28."
